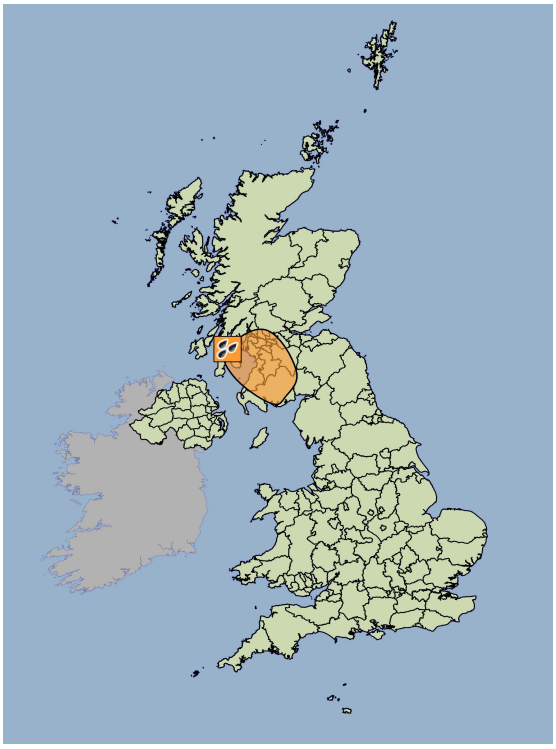
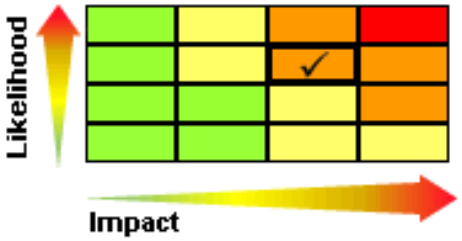
National Severe Weather Warning Service





Chief Forecasters Assessment
A depression will develop to west of Scotland during Sunday afternoon with a strengthening southwesterly airflow enhancing the rainfall, especially across high ground during the afternoon and evening. The rain will ease early tonight. Further accumulations of 20 to 30 mm of rain are expected and locally 50 mm over high ground.

The Met Office have issued an **Amber Warning** of **Rain**

Valid from **12:30 on Sun, 15th Nov 2015** until **03:00 on Mon, 16th Nov 2015**

Rain will become persistent and heavy again during Sunday afternoon and evening, finally clearing away in the the early hours of Monday morning. The rain will be especially heavy over hills exposed to the strengthening southwesterly wind.

Be prepared for some disruption to travel due to flooding, either from surface water flooding or flooding from rivers which have remained high after recent heavy rainfall.

This is an update to the Amber Warning issued on Saturday, to extend the warning area north-eastwards and to extend the end time.
